Social network plug-ins

Social plug-ins for the facebook.com social network are hosted on the EVENTIM.RO platform. The network operator is Facebook Inc., 1601 S. California Ave, Palo Alto, CA 94304, USA (hereinafter "Facebook"). When an EVENTIM page containing a social plug-in (e.g., the "Share" button) is accessed, the user's browser connects to Facebook servers and downloads the content required for the social plug-ins. Facebook receives the web address of the EVENTIM page accessed by the user, the date and time of access and the user's IP address. If the user is logged into Facebook, Facebook is able to match the visit to the respective page with the Facebook user account. If the user clicks the "Send" button, this information is also transferred to Facebook and stored there. EVENTIM.RO has no influence over the content of the plug-ins or the information transferred to Facebook.

The purpose and scope of data collection, the further processing and use of data by Facebook and the user's rights and settings options to protect the user's privacy can be found in Facebook's privacy policy.
